DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson et al. (USPN 5553209), hereinafter simply Johnson.

2. In regard to claims 1, 17, Johnson teaches a symbol expansion method and apparatus comprising: selecting a map portion containing one or more map display symbols on a computer map display; see col.2 lines 1-5; and presenting a symbol expansion display related to the map portion on the computer map display, see col.3 lines 5-12.

3. In regard to claim 2, Johnson teaches a symbol expansion method and apparatus, wherein the selecting comprises: pointing to a map display symbol with computer pointing device. See col.3 lines 14-20.

4. In regard to claim 3, Johnson teaches a symbol expansion method and apparatus, wherein the selecting comprises: selecting a map portion of the computer map display containing the one or more map display symbols with the computer pointing device. See col.3 lines 5-20.

5. In regard to claim 4, Johnson teaches a symbol expansion method and apparatus, wherein the presenting comprises: relating the one or more map display symbols to one or more map symbol records retained in a computer memory, each containing record components; selecting

one or more record components from among the one or more map symbol records; and
formatting the one or more record components for the symbol expansion display. See col.4 lines
58-65.

6. In regard to claims 5, 21, Johnson teaches a symbol expansion method and apparatus,
wherein the selecting one or more record components comprises: selecting record graphics
components of the one or more map symbol records. See col.3 lines 14-25.

7. In regard to claim 6, Johnson teaches a symbol expansion method and apparatus, wherein
the selecting one or more record components comprises: selecting record data of the one or more
map symbol records. See col.3 lines 14-25.

8. In regard to claim 7, Johnson teaches a symbol expansion method and apparatus, wherein
the selecting record data comprises: filtering the record data of the one or more map symbol
records to provide symbol expansion data corresponding to a selected record data type. See col.3
lines 25-35.

9. In regard to claim 8, Johnson teaches a symbol expansion method and apparatus, wherein
filtering the record data comprises: selecting a record data type selected from the group
consisting of a dollar asset range record data type, a friendliness range record data type, a
personnel size record data type, a security classification record data type, a type of service record
data type, and an age of symbol record data type. See col.8 lines 60-67.

10. In regard to claim 9, Johnson teaches a symbol expansion method and apparatus, wherein
the selecting record data comprises: filtering the record data of the one or more map symbol
records to provide symbol expansion data corresponding to a selected record data range. See
col.3 lines 25-35.

Art Unit: 2676

11. In regard to claim 10, Johnson teaches a symbol expansion method and apparatus, wherein the selecting record data comprises: algorithmically combining map symbol records to provide symbol expansion data. See col.3 lines 25-35.

12. In regard to claims 11, 19 Johnson teaches a symbol expansion method and apparatus, wherein formatting comprises: providing a list of the symbol expansion graphics, movable by the user on the computer maps display, and associated with the record graphics components of the one or more map symbol records. See col.1 lines 15-22.

13. In regard to claims 12, 20, Johnson teaches a symbol expansion method and apparatus, wherein formatting further comprises: providing a list of the symbol expansion data, movable by the user on the computer maps display, and associated with the record data components of the one or more map symbol records. See col.2 lines 60-67.

14. In regard to claim 13, Johnson teaches a symbol expansion method and apparatus, wherein providing a list of symbol expansion data comprises: providing a user selectable language for the list of symbol expansion data. See col.8 lines 60-67.

15. In regard to claim 14, Johnson teaches a symbol expansion method and apparatus, wherein formatting further comprises: providing a lead line from the map display symbol to the symbol expansion display where the lead line moves in accordance with the position of the symbol expansion display. See col.3 lines 5-13.

16. In regard to claim 15, Johnson teaches a symbol expansion method and apparatus, wherein formatting further comprises: color coding a symbol expansion graphic to indicate an attribute of the object represented by the map display symbol. See col.1 lines 15-22

Art Unit: 2676

17. In regard to claim 16, Johnson teaches a symbol expansion method and apparatus, wherein formatting further comprises: augmenting the symbol expansion display with special identifying characters that indicate when symbol information components have been omitted from the symbol expansion display. See col.7 lines 60-67.

18. In regard claim 18, Johnson teaches a symbol expansion method and apparatus, wherein the for presentation processor comprises: a computer memory having one or more map symbol records stored therein; a relation processor which relates the one or more map display symbols to one or more map symbol records retained in the computer memory; a selector for selecting one or more record components from among the one or more map symbol records; and a display processor which receives and formats each of the one or more record selected components for the symbol expansion display. see col.7 lines 39-58.
